Test Comments: *Despite the windy dry dust storms during planting, this site's good soil conditions promoted good emergence and uniform stands. Joe said that his farm received an August rain, which helped bump up yields. Plant heights ranged from 6-8 feet tall. Site had very little lodging. Ear tip fill and kernel depth were both awesome.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
