Test Comments: *Dave's strip-till field really conserved the soil moisture necessary to produce these great yields. Plant heights were only 6-8 feet, but ears had excellent tip fill. Severe winds must have green snapped a few (dozen?) susceptible hybrids. Stand values reflect any green snap reductions. Lodging was minimal. The day of harvest, gusty winds caused some stalk lodging, documented in the lodging score.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
