**Test Comments:** Roger commented that all his corn is good yielding this year. The site had excellent seedling emergence, so stands were uniform. Both stalk lodging and root lodging, although not severe, are represented in the lodging scores. Plant height ranged from 7-9' tall. Ear development had great tip fill and deep kernels. Some morningglory was present.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
