**Test Comments:** Overall, this plot performed very well with uniform stands and emergence. Corn plants stood very well with little sign of disease or insect pressure. Some of the early season hybrids were beginning to lose their fodder while fuller season remained intact. Favorable late season weather led to fully pollinated ears with a very deep, large kernels. There was little or no weed pressure within the plot.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
