**Yield & Income Factors:** Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$3.50; non-GMO = \$3.50

**Test Comments:** *This location is a good representation of the area with good fertility and weed control. Summer rainfall was good and mild summer temperatures resulted in good yielding corn with large kernels. This site had some soil variations but texture and elevation were relatively uniform. Unfortunately, due to a planting error 1 replication in each test had to be discarded.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different

**Test Comments:** *This location is a good representation of the area with good fertility and weed control. Summer rainfall was good and mild summer temperatures resulted in good yielding corn with large kernels. This site had some soil variations but texture and elevation were relatively uniform. Unfortunately, due to a planting error 1 replication in each test had to be discarded.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
