LSD (0.25) =	9.3	0.2	1

Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$3.15; non-GMO = \$3.15

Test Comments: *This site generally had excellent stands. The plant population variability of some plots was due to high winds that caused goosenecking and greensnap among earlier maturing hybrids. Yields were good here, as they have been across southern MN this year. I am pleasantly surprised that stalks stood so well at this late date, but there were no strong winds during October to cause stalk breakage.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
