Test Comments: *This location was planted early in the season and went through a cool wet spell before emergence. Early season vigor was excellent for the majority of the hybrids. The plot was nice and uniform at the V4-V5 growth stage. Conditions during the growing season were ideal, except for lack of rainfall in September. Corn was all standing well with little disease pressure to be noted at harvest time.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
