Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$2.69; non-GMO = \$2.69

Test Comments: *The state of North Dakota was exceptionally dry this season. This test site received an estimated 13.75" of rain, planting to harvest, which is 18.5% below normal. Drought stress was high, greatly limiting yield potential. Most hybrids had zipper ears and very small in size. Fuller maturity products had better kernel set, fuller ears but small circumference. One stressed, variable yield rep was omitted.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
