Test Comments: *Good weed control all season. With the dry weather in July and the cool August, Chad Biss, our host farmer here, has been happy to see corn yields close to 200 bushels per acre in his fields. We saw some relatively minor goosenecked corn here. Grain moisture ran higher at this location compared to what we have seen at other sites so far this year.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
