New test site, no yield history

Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$3.00; non-GMO = \$3.00

Test Comments: *The corn stalks stood straight and even at harvest. Weed control was excellent all year. Stalks were a little damp at harvest as we harvested in a light mist at times. Harvest is dragging out as weather, grain storage and grain drying issues have slowed the harvest pace. Strong yields in the area as most fields have been around 200 bu/acre. Stalk lodging was limited to a few products.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
