**Yield & Income Factors:** Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$3.00; non-GMO = \$3.00

**Test Comments:** *This was the first corn plot we planted this year. Despite slow growing degree unit accumulation this year, the early planting date helped provide low grain moistures at harvest. This site had good weed control all season. Corn plants were 7 to 8 feet tall with no lodging issues. Harvest conditions were good. Area corn fields are reported to be yielding just over 200 bushels per acre.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
