Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$3.00; non-GMO = \$3.00

Test Comments: Light tillage was done on this traditionally no-till field which helped make a nice warm seed bed this spring. Corn was relatively short, 6 feet or less, with low ear placement on some plots and may have contributed to some ears not being gathered during harvest. Many plants had tops off and minor stalk lodging was common throughout the plot. Happy to see 200+ bu yields from short plants.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
