TEST COMMENTS: Emergence was excellent at this plot, with good early season growth. Some plants were as tall as 60". Limited rainfall late in the season did not help the beans mature properly. More than half of the varieties that still had green stems at harvest, and 1/3 of varieties were still holding on to green leaves, causing harvest difficulties. Overall it was a very nice uniform set of data.

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
