**Yield & Income Factors:** Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$3.25; non-GMO = \$3.25

**Test Comments:** *This site was a victim of the remnant winds of Hurricane Florence. Lodging, mostly root lodging but some stalk lodging was extensive for some products. It was difficult to uniformly pick up the down corn to create variable yield results and elevated LSD and CV values. This plot was high yielding, and hybrids with strong roots stood out. A very useful test site to choose hybrids with strong standability.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
