**Yield & Income Factors:** Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.030 Prices: GMO = \$3.75; non-GMO = \$3.75

**Test Comments:** This plot received the least rainfall of all locations in the Michigan West Central region, which is reflected in the yields.

It remained dry through pollination but good rains during grain fill helped to hold on to some of the potential with good kernel size and weight. Plant height was limited by the stress during vegetative growth which helped with good standability.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
