**Test Comments:** *At planting, this area was quite wet which delayed planting. The plot was planted a few days before Paul, our host, planted around us. The crop experienced a slightly drier than average summer with a dry spell from mid-July to late August with only 0.14" of rainfall. Once harvest began, rains began saturating the Red River Valley, delaying harvest. Minor stalk lodging was noticed in some hybrids.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
