Test Comments: *Planting conditions were ideal in this area. This is a really light soil, that contains lots of stones, but the plot was under an irrigation pivot. I'm not sure if Matt had to run the pivot much this year due to all the rainfall. Plants were short statured but still standing well at harvest. Plot had an excellent pollination period, but kernel depth was shallow. Very few diseases present at harvest.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
