TEST COMMENTS: Plot was finally planted in mid May once soil conditions dried enough. Most of the growing season weather was favorable. After Labor day, it started raining and never seemed to quit. Plants were medium statured with small diameter stems which made them vulnerable to lodging issues. Plot was free of any diseases and seed size was exceptionally large.

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
