### TEST COMMENTS:

Planting was delayed all across Iowa this year, and we were able to start at this location first. The soil conditions were very good at planting, and plants emerged with no problem. The area received almost 14 inches above normal rainfall this year. The plot location drained well and did not have any ponding problems. Brent and Steve are just getting started on harvest, and are seeing about a 20 bu less on average than last year. They are surprised and thought yields would be lower due to the conditions. Harvest of the plot went well with no lodging problems. Early-season hybrids had girthy ears, and the full season hybrids had long, narrow ears.
