### TEST COMMENTS:

*Planting at this site was delayed until June 3 due to wet and cool soil. Once planted, it emerged well. At harvest, plants were well matured, and stalks were standing well. This is the first site I have seen ear size varied throughout the whole plot. Pollination was good, though cobs were soft and made shelling a challenge. Mike stated he could see yield variance in the fields with different soil types causing low averages for the field.*
