TEST COMMENTS:

Planting went very well then showers moved in, and Dan was delayed planting around plot. At emergence, the field had problems, and they had to replant. With the replant, harvest was delayed with high moisture beans around the plot. Plants stood 27 to 34 inches, and pod sets had some space between them. There was no weed pressure, and some varieties did have emergence issues in small areas of the plot. There were no lodging problems. This area also has been delayed with slow dry down, but they have had some sun and harvest is picking up.
