TEST COMMENTS:

We found a quick opportunity to get this soybean plot no-till planted during the middle of May, which proved beneficial as 4.5" of rain fell from planting until June 1. This Moody silty clay loam drains excellent, and though stands were slightly impacted by the excessive early season moisture and cool June temperatures, plants grew at a steady pace through the remainder of the season. Most varieties at harvest were generally tall with more lateral branching than we've seen at other sites.
