**Test Comments:** Outstanding results for a corn on corn test site. Some leaf diseases were noted but light pressure. At harvest, plants had strong stalks, very little lodging. Large and girthy ears, held by strong shanks, were filled to the tip with deep kernels. Sturdy cobs made shelling easy. Ryan, our host grower, has worked hard for successful corn on corn production and these results show he achieved his goal.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
