**Test Comments:** *This site was planted about 10 days after Leon planted the field surrounding the plot. A hard frost on May 13 caused his corn to start over, while the plot corn showed less damage as it was just emerging. Still, Leon believes his 2016 corn may be his best yielding ever. Rain does make grain. No killing frost occurred until mid-Oct., and excessive rains in Aug. and Sept. allowed the corn to maximize yield.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
