Test Comments: *This locations got off to a great start, like most all corn planted in this area. Mother nature was kind for most of the growing season, giving consistent rainfall whenever needed. All ears were filled with kernels to the tip, and there were several hybrids that with 16-18 kernel rows around. There was little evidence any diseases that hurt yield. Any lodging that was noted was all stalk lodging.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
