TEST COMMENTS: *What a wonderful sight this was. Plants were tall and also had grain. Almost every plant had a fully filled ear. Milkline was highly variable, noting 10% to 60% within the same ear. Ear shanks were weak. Plant contact with the chopper head would often cause ear drop. Rainfall was limited here but later planting minimized severe heat impact on pollination which impacted other fields. Good plant uniformity within rows was also noted. Samples analyzed by Dairyland Laboratories, Inc.*
