**Test Comments:** *The weather did not stress the crop this year. Rainfall was plentiful, but never too excessive. The crop experienced one 90 degree weekend in late Septmeber that shut down the plants. High winds on one day did cause some hybrids to show more stalk lodging. The first killing frost occurred October 16. This site is pattern tiled for drainage.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceeded the grain moisture limit for this test. **ns** = column values not significantly different
