**Test Comments:** *Moisture was timely all season, while temps were moderate all year. August was especially cool, but Sept saw above average temps. Paul told me that 90 mph straight line winds in July affected some fields depending on the corn growth stage, but very little damage occurred here. Paul expects corn yields to equal last year, while bean yields were 15 bpa less this year.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
