**Yield & Income Factors:** Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$2.69; non-GMO = \$2.69

**Test Comments:** *The plot was planted into nice dry conditions the same day Ryan, our host farmer, planted the surrounding field. Up to July 17, the growing season rainfall was slightly below average. After July 17, things got much drier receiving only 1.5" through September 16. The entire growing season was 27% drier than normal. Limited rain and the soil's varied sand content caused lower variable yields in the test.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
