Test Comments: *This site was a very uniform and level site. Planted into a very clean and good seedbed. Mike, our host grower, reported that over 9 inches of rain fell on the site during June. Most of the lodging noted was stalk lodging but there were a few isolated spots of root lodging. Harvest was delayed by early October rain and early November snow and cold. A full-season test rep removed due to ponding issues.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
