### TEST COMMENTS:

*Planting started early in this area and soil conditions were good. This was the first year having a plot with Mike, and he looked forward to seeing FIRST data in his field. In late June we took stand counts, and the plot looked very good. Farther into the season, it started to go into drought stress. With the strong storm in August, the plot was lodged severely, and harvest data could not be completed. In this area, fields were being disced in without being harvested.*
