### TEST COMMENTS:

*This location was planted in absolutely perfect soil conditions. Emergence was awesome and as even and uniform as it could get. This plot showed an extreme amount of potential during the early summer. In July, before pollination, the plot took on some heavy winds and experienced some green snap in certain areas of the plot, followed by an extremely dry August. The plot still was able to fill out nicely, but Mr. Cunningham figures there was a yield loss in that field of approximately 20-30 bu/A.*
