TEST COMMENTS:

Beautiful soil conditions at planting got the corn off to a good start in this 3rd year corn field. Growing conditions were quite good until mid-July, but then turned quite dry through maturity. Paul noted that fields in his area got more rainfall in August and September north of U.S. Hwy 14, and less as fields got closer to the I-90 corridor. Stalks stood well here, and plant health was quite good at harvest.
