TEST COMMENTS:

Planting conditions were excellent. Good soil moisture and heat units led to good emergence. The plot looked good through June. When July rolled around the rain became very spotty and the heat increased. August was much like July, hot and dry. September saw some more rain to help fill what kernels did pollinate. Standability was a problem for certain hybrids. The overall rating of the plot is a 7 out of 10. (10=best)
