### TEST COMMENTS:

*This is a uniform location that was planted in mid-May in good conditions. The site had an application of chicken litter applied during the fall. The high fertility added with lots of moisture and heat during the growing season led to a high yielding plot. Plants were podded well with large beans and were standing well at harvest. Two replicates were harvested on 11/9, and one on 11/10, which had higher moisture from the dew.*
