### TEST COMMENTS:

*This location was planted in somewhat dry conditions in late April. This entire area was on the dryer side most of the growing season, but some timely rains, a few tenths here and there, kept things going. Mr. Ringger was expecting to see plenty of tipback this year but was pleasantly surprised with field averages around his farms thus far. Plants were standing very well and most ears filled to the tip. No foliar disease in this area to speak of. A very nice uniform plot in all aspects.*
