HARVESTED - STAND:	Oct 9 129.9 /A

TEST COMMENTS:

A wet spring led to delayed planting at this site. Then the rain shut off. Nate mentioned that the site received 2" of rain after planting until mid-August. There were a number of varieties that were no more than knee-high at harvest. During an August site visit, there were very few diseases noted and the plot looked better after some rainfall. Weed control was very good throughout the plot. One replicated was removed due to higher variance likely from a drier tile drain area.
