### TEST COMMENTS:

Planting conditions were excellent. Soil moisture and temperatures were good. Corn emerged uniformly and got off to a fast start. This plot was under irrigation but was used sparingly with good showers through the summer. Disease was kept under control with fungicides. Lodging was 90% root lodging due to big yields and some root rot, however, they were still able to go through the combine. The overall rating of the plot is 8 out of 10. (10=best)
