TEST COMMENTS:

This site was the first FIRST trial planted this year. Matt, our host farmer, was also planting around the test. A super-wet April followed. It was the wettest April on record, for St. Louis, and this area, in fact. I believe the weather limited the yield potential. There were widespread reports of tassel wrap, particularly with some early maturity hybrids. Yields here ranged from 225 to 280, so a yield spread of ~ 55 bu/a. Great data to see the hybrids' response to multiple stressors.
